© International Road Assessment Programme (iRAP) 2018

iRAP technology including protocols, processes and brands may not be altered or used in any way without the express written agreement of iRAP.

The Star Rating for Schools is a division of the International Road Assessment Programme (iRAP), a charity registered in England & Wales under company number 05476000.

Registered Office: 60 Trafalgar Square, London, WC2N 5DS.

1. Introduction to Star Rating for Schools

Every day, during their journey to and from school, children die or are seriously injured in traffic crashes. Some crashes occur just a few metres from the entrance to the school. Road traffic injury is now the leading cause of death for children and young adults aged 5–29, and it is estimated that 500 children a day are killed in preventable traffic crashes around the world. Every death and every injury poses a threat to children’s right to an education.

Star Rating for Schools (SR4S) is an award-winning, evidence-based tool for measuring, managing and communicating the risk children are exposed to on their journey to school.

The system combines an easy-to-use School Assessment Android app and a Global Reporting for Schools web application. These applications work together to harness the power of the International Road Assessment Programme’s (iRAP) Star Ratings to measure the risk children are exposed to on their journey to school.

iRAP Star Ratings are an internationally recognised measure of risk on the roads, with the least safe roads rated as 1 star and the safest as 5 stars. Star Rating for Schools utilises the pedestrian component of Star Ratings to provide a measure of the contribution of road design to the risk of each pedestrian. The app can deliver a quick and easy measurement of safety at the site and can point towards potential road upgrades. It supports quick interventions that save lives and prevent serious injuries from day one.

The Star Rating for Schools App has been made possible thanks to the generous Foundation Sponsorship of FedEx, major donor support from the FIA Foundation and global support of 3M, and is made safer by iRAP. iRAP (www.irap.org) is a registered charity with a vision for a world free of high-risk roads.

In 2018, Star Rating for Schools was awarded the prestigious Prince Michael International Road Safety Award, recognising the application as an innovative and valuable development with huge potential at a community level to reduce risk and save the lives of children and pedestrians worldwide.

Our vision is of a world where all children travel to and from school safely.

2. Overview

The Star Rating for Schools logo is the exclusive property of the International Road Assessment Programme (iRAP) and is restricted for use in association with SR4S projects.

This style guide outlines the correct usage of the Star Rating for Schools logo and brand for SR4S Partners who wish to promote the Star Rating for Schools application in promotional and supporting material for projects such as: website, presentations, media and online communication etc.

The Secretariat has established support systems and branding template materials to support efficient programme management via shared resourcing and consistent brand management.

3. The Logo

3.1 Colour Reproduction

Full logo

STAR RATING
FOR SCHOOLS

App logo

Download [here](#).

Colour palette: For web use, an RGB jpeg version of the logo is available. The logo should be reproduced where possible using the CMYK 4 colour process. A CMYK version of the logo is available.

The RGB, CKMY and HEX colour values are shown below.

TEAL RGB R 0 G 174 B 180 CKMY C 100 K 3 M 0 Y 29 HEX #00AEB4 White text over	LIGHT GREEN RGB R 146 G 192 B 31 CKMY C 24 K 0 M 84 Y 25 HEX #92C01F White text over	LIGHT RED RGB R 229 G 42 B 76 CKMY C 0 K 82 M 67 Y 10 HEX #E52A4C White text over	ORANGE RGB R 230 G 138 B 36 CKMY C 0 K 40 M 84 Y 10 HEX #E68A24 White text over	PALE GREEN RGB R 216 G 209 B 82 CKMY C 0 K 3 M 62 Y 15 HEX #D8D152 White text over

3.2 Logo size

To maintain the legibility of the iRAP brand, the minimum size that the master version of the logo can be displayed in is 45mm in length with strapline.

An alternative, smaller version of the logo is also available where the logo needs to be produced at a size less than 45mm in length. The small version of the logo is shown above and is distinguished by it not containing the full width wording. For small application, please use this icon-only version for legibility.

Clear space should always surround the logo, separating elements such as text, images or outer edges of printed materials. This open area preserves the legibility and visual impact of the logo.

The minimum amount of clear space around the logo is equal to the height of the 'STAR RATING' letters.

4. Logo Usage

The Star Rating for Schools logo should be displayed in colour or in reverse format white and may not be cut, modified or mixed with other logos in any way.

4.1 Electronic usage

For electronic usage, use the .jpg, .gif, .tif or .png versions.

The .png versions are optimised for use in Microsoft documents such as Word, PowerPoint and Excel. The .png versions are preferred over all others for such documents.

The various formats and their respective benefits are described below:

Type	Description	Usage	File size
.jpg	A file format commonly used to display photographs and other continuous-tone images at varying quality levels for a range of applications.	- Low to high-resolution images - Microsoft documents - On-screen for web or software - Local laser print quality - Publishing/print quality	Small to large
.gif	Graphics Interchange Format (GIF) is the file format commonly used to display colour graphics and images over the web and other online services.	- Web - On-screen delivery in software - Not suitable for printing	Small
.tif	Tagged-Image File Format (TIFF) is a flexible bitmap image format supported by virtually all paint, image-editing, and page-layout applications.	- Higher-resolution images - Microsoft documents - Local laser print quality - Publishing/print quality	Medium to large
.png	Developed as a patent-free alternative to GIF, Portable Network Graphics (PNG) format is used for lossless compression and for displaying images on the web. Unlike GIF, PNG supports 24-bit images and produces background transparency without jagged edges.	- All Microsoft documents - Well suited to PowerPoint presentations - Local laser print quality or publishing print quality depending on resolution	Small to medium
.eps & .ai	Encapsulated PostScript (EPS) language file format can contain both vector and bitmap graphics. Can only be opened by PostScript based software such as Adobe Illustrator.	- High quality publishing/printing - Not suitable for on-screen delivery or Microsoft docs	Small to large

4.2 Publication usage

If you require a logo for a high-resolution, print-quality document, such as a brochure, newsletter, magazine, merchandise or signage, use the .eps or .ai (Adobe Illustrator) versions. Note: .eps and .ai files can only be used in postscript-based desktop publishing software packages, such as Adobe InDesign or QuarkXPress. They do not work in Microsoft Office applications.

5. Star Ratings

The SR4S app is powered by iRAP's Star Rating for Pedestrians. The iRAP colour palette is based on a traffic light system using a continuum from dark, signifying high risk, to light, signifying low risk. A 1-star road is the least safe and a 5-star road is the safest. The standardisation of colours provides an internationally recognised system that offers strong visual identity and recognition that reaches beyond language and culture.

6. Typography

Materials prepared according to the SR4S brand should preferably use the typography below:

Trade Gothic Bold

ABCDEFGHIJKLMNOPQRSTUVWXYZ
abcdefghijklmnopqrstuvwxyz
1234567890£%&(,,: #!?)

Trade Gothic Light

ABCDEFGHIJKLMNOPQRSTUVWXYZ
abcdefghijklmnopqrstuvwxyz
1234567890£%&(,,: #!?)

Trade Gothic Bold Oblique

ABCDEFGHIJKLMNOPQRSTUVWXYZ
abcdefghijklmnopqrstuvwxyz
1234567890£%&(,,: #!?)

Trade Gothic Reg

ABCDEFGHIJKLMNOPQRSTUVWXYZ
abcdefghijklmnopqrstuvwxyz
1234567890£%&(,,: #!?)

Trade Gothic Medium

ABCDEFGHIJKLMNOPQRSTUVWXYZ
abcdefghijklmnopqrstuvwxyz
1234567890£%&(,,: #!?)

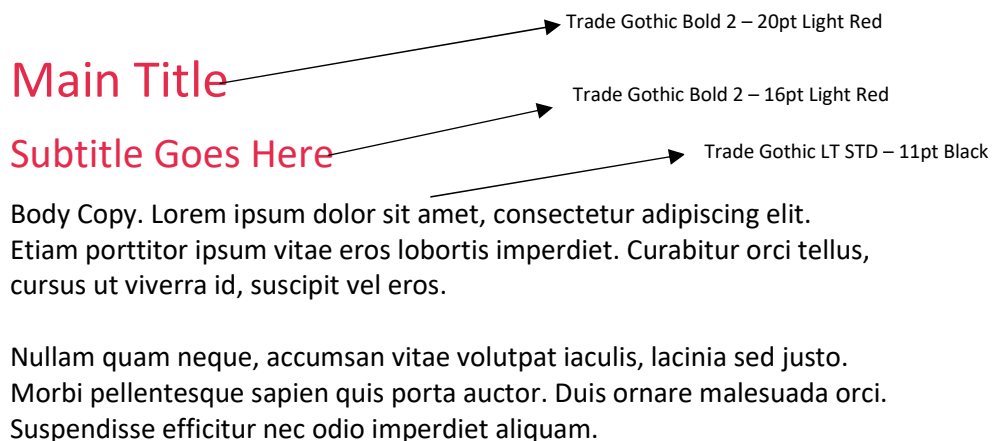

Trade Gothic Oblique

ABCDEFGHIJKLMNOPQRSTUVWXYZ
abcdefghijklmnopqrstuvwxyz
1234567890£%&(,,: #!?)

7. External Documents

For external documents, public-facing print projects, large-format signage and publications, Trade Gothic is used. This is our main font and should be used where possible offline.

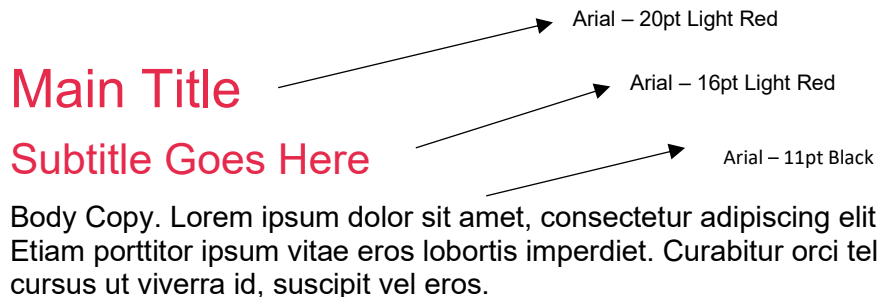

We use contrasting font sizes to deliver our communications:

8. Internally Produced Documents

For all internally produced documents (e.g. Word documents, PowerPoint presentations, etc), Arial is used as a universally available computer font. We use contrasting font sizes to deliver our communications:

Nullam quam neque, accumsan vitae volutpat iaculis, lacinia sed justo. Morbi pellentesque sapien quis porta auctor. Duis ornare malesuada orci. Suspendisse efficitur nec odio imperdiet aliquam.

9. Image Use

We use a balance of imagery to help illustrate the local communities, safety impacts and project-level activities that are involved in making school journeys safer for kids around the world.

We aim to use people in as many situations as possible, relevant to our criteria, to portray the human impact of our work, aiming to always maintain realism within the shot.

It is essential that the appropriate resolution of images is always used to suit the purpose. Low-resolution images will appear blurry when reproduced in large sizes or in print materials. Always aim to use high-resolution images for print materials.

It is the responsibility of the image supplier to ensure relevant approvals are obtained prior to photo use and supply, and to ensure that images are appropriately credited. Local school and project partner image use policies must be strictly adhered to.

All photos and images used on the Star Rating for Schools website and associated promotional material must be correctly credited in the following format.

Photo credit (insert name and organisation)

Information and images on the Star Rating for School website and social media platforms may be used for non-commercial and educational purposes. In other words, an internet user may download a file and share it with others where no personal or commercial gain is involved.

To request permission to use of any of the files or images used on the Star Rating for Schools website or supporting material, or if you have questions regarding this policy, please contact schools@irap.org. When requesting permission to use an image, please include the URL of the image.

WELCOME TO THE STAR RATING FOR SCHOOLS NEWSLETTER

NOVEMBER 2019

Star Rating for Schools (SR4S) is an easy to use, objective and evidence-based tool for measuring, managing and communicating the risk children are exposed to on school journeys. The Global Launch of SR4S will be held in February 2020, in Stockholm, as part of the Child Health Initiative "This Is My Street: Safe and Healthy Journeys for Children and Youth" conference.

In preparation for the Global Launch, we have been incorporating new features based on the pilots led by 12 [Lead Partners](#) in over 30 countries, many of these already saving lives around the globe. [Read more here](#) about the Roadmap to 2020.

**CASE STUDY: BOGOTA, COLOMBIA
IMPROVED PEDESTRIAN
FACILITIES AROUND
IED RODRIGO LARA BONILLA**

PROJECT PARTNERS: **Alcaldía de Bogotá**, **Secretaría de Movilidad**, **GRUPO**, **WORLD BANK GROUP**

A 2-star safety jump and safer school journey was achieved for local children

In 2018, as part of the city's Vision Zero approach, the Bogotá Mobility Secretariat launched their 2,000m safe school zone, around the IED Rodrigo Lara Bonilla Public School in Ciudad Bolívar. Ciudad Bolívar is one of the lowest income areas of Bogotá, Colombia. It is known as a very deprived district with a lack of appropriate public facilities, which translates to high risk environments.

PROJECT SUMMARY

The Mobility Secretariat used the Star Rating for Schools (SR4S) tool:

- To provide an objective measure of risk and star rating performance at the existing location;
- To simulate scenarios and measure star rating improvements associated with the implementation of a planned set of countermeasures.

The SR4S reports were also used in the process of engaging the community and developing support for the intervention among local decision makers, residents and the school community.

Initially five locations around the school (data points) were assessed using the SR4S app. Given the results of the risk evaluation and local conditions, three were prioritized (data points 3, 4 and 5) for further investigation and improvement.

March 2018: As part of the Bloomberg Initiative for Global Road Safety (BIGRS) in partnership with the World Bank Global Road Safety Facility and NACTO-GDOT, the Mobility Secretariat started a pilot project in the area. The countermeasures were first tested with temporary materials to verify their impact. Cones and plants were introduced to create safe pedestrian crossings to the school, protect vulnerable users and enforce motorized vehicles to travel at a safe speed.

The temporary solution allowed the project team to measure the safety impact of the interventions.

Before	★	★	★	★	★
After	★★★	★★★★	★★★★	★★★★	★★★★

ABOUT THE SCHOOL ZONE AREA

- The area around IED Rodrigo Lara Bonilla Public School has high volumes of pedestrians.
- From 6.00am to 8.30am, 499 pedestrians were counted.
- 78% of those observed in the area were seen between 6.00am and 6.30am.
- The pedestrian crossing point at the intersection of Calle 64 South and Carrera 38 was identified as the critical point of danger for accessing the school. The site recorded counts of 445 pedestrians during the assessment, with 57% of them children.

July 2018: After adjusting detailed designs and meeting with the community to discuss impressions and results, a permanent solution was implemented.

The conditions around the IED Rodrigo Lara Bonilla Public School were then assessed using the Star Rating for Schools app, which resulted in an improvement from 2- and 3-stars to 4- and 5-star safety.

The SR4S app supported local staff in generating a new road design that improved safety for kids at the most critical point of their journey to school. The treatments also included higher visibility of waiting areas for pedestrians and safer vehicle speeds.

After the intervention, speeds at the intersection reduced by up to 25%, improving pedestrian safety

Our vision is of a world where all children travel safely to and from school
starratingforschools.org

11. Case Study Template and News

A Star Rating for Schools Case Study template has been developed to showcase project successes in a consistent and professional way. If you have a case study that you would like to submit for potential publication, you can do so using the [SR4S Case Study](#) form.

We also welcome news submissions. We'd love to hear from you so that we can promote your programme initiatives and project successes. To submit a potential news item for promotion on the official SR4S channels, please visit the [SR4S News](#) form.

12. Associated Partners

Star Rating for Schools projects usually involve a number of project partners and each will have their own branding guidelines. You are encouraged to promote partner involvement in all project materials and communications (e.g. by including their logos) to recognise the joint success and their important contribution. Please seek approval before using associated partner logos and follow their branding guidelines and conditions.

13. Usage Submissions

The Star Rating for Schools Programme operates across five continents around the globe. Tracking programme and project success is a challenge and the sharing of resources will help to support the whole SR4S community in their projects and in celebrating success. We'd love to hear from you whenever you are promoting SR4S success and using the branding. We would appreciate it if you can provide electronic copies of the SR4S brand in action. Please submit copies of promotional materials to the Star Rating for Schools Secretariat at schools@irap.org. Your great work may inform templates that can be shared to help other SR4S partners.

14. SR4S Socials

We'd love to hear from you and help celebrate your SR4S successes on our promotional channels. When posting to social media, please tag: [@SR4Schools](https://twitter.com/SR4Schools)
