

TUTORIAL: USING SR4S DEMONSTRATOR

With the [SR4S Demonstrator](#), it is possible to get to know the road attributes assessed with SR4S and their impact on pedestrian safety.

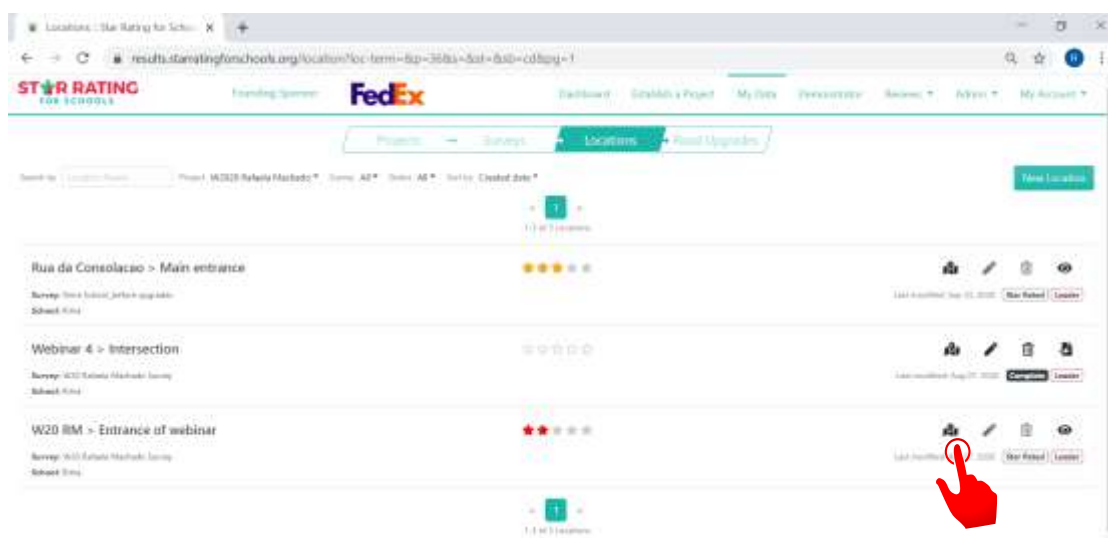

For formal assessments, the SR4S Demonstrator will be available after each Location is approved in the review process and the Star Rating is calculated. With Demonstrator, the results from the SR4S assessments can be used to identify potential countermeasures and to test different scenarios of interventions, looking for low-cost solutions with a high impact on road safety.

Step 1: Open your internet browser and head to the [SR4S dashboard](#) and log in to the SR4S with your ViDA account.

Note: Google Chrome or Mozilla Firefox internet browsers are recommended for the optimum experience.

Step 2: Access *My Data* and open your list of Locations. Click on *View Details* next to the Location. Note that SR4S Demonstrator is only available in Locations with calculated Star Ratings.

Step 3: Click on the Experiment icon and open the SR4S Demonstrator.

Step 4: On the SR4S Demonstrator page, select the road attributes that you wish to change and test different countermeasures and scenarios with combinations of upgrades e.g. including a pedestrian crossing or changing the facility provided; reducing the speed limit and operating speed; improving Delineation; adding School Zone Warning and Sidewalks, if not present.

Please note that you should aim to increase your Star Ratings: Locations with Star Ratings of 5 stars are the safest Locations. The Risk Score indicated in the Demonstrator is also helpful for identifying countermeasures that can improve safety at your Location even if you have already achieved 5 stars. Please note that the lower the Risk Score, the safer the Location (and don't confuse Star Rating with Risk Score).

Here is an example of combined upgrades for different upgrade scenarios.

	Original	Proposal 1	Proposal 2	Proposal 3	Proposal 4
Speed limit	60 km/h	50 km/h	40 km/h	40 km/h	40 km/h
Operating speed	60 km/h	50 km/h	40 km/h	40 km/h	40 km/h
Delineation	Poor	Poor	Poor	Adequate	Adequate
School zone warning	No warning	No warning	No warning	Signs and markings	Signs and markings
School supervisor	No supervisor	No supervisor	No supervisor	Supervisor present	Supervisor present
Pedestrian crossing	No facility	No facility	No facility	No facility	Signalised crossing
Star Rating Score	55.3	29.09	12.22	8.32	2.09
